

How to replicate a Moodle course on your Learning Management System (LMS)

STEP 1

Download the Course package available on the [ENLIVEN website](#):

- Go to OPEN RESOURCES
- Find the course you want to replicate
- The course package will be available in as an mbz file.

A Moodle Backup File (.mbz) is a compressed archive of a Moodle course that can be used to restore a course within Moodle and to inst. The file preserves course contents, structure and settings, but does not include student work or grades.

[Learn more about Moodle Courses Backup](#)

STEP 2

If you are using Moodle
Follow this [video tutorial](#) on how to restore a backup course.

If you are using Blackboard
Follow this [tutorial](#) to learn more about [Blackboard Course Conversion Tool](#).

If you are using Canvas
Follow this [tutorial](#) on how to import content from [Moodle into Canvas](#).
